

## **KULZER SELLS ENHANCED GEOMETRY SOLUTIONS**

**With effect from 1 May 2020, Kulzer is selling the Italian CAD company Enhanced Geometry Solutions (EGS Srl). Customers can continue to count on the ongoing service and maintenance of their cara Scan and the cara CAD software – the EGS products in the Kulzer portfolio.**

Hanau / 2020-04-02. In 2014, Kulzer purchased EGS Srl to gain access to proprietary 3D scanners and CAD software solutions. Since then, EGS together with Kulzer's dental expertise continued to develop new generations of 3D scanners, cara Scan, and additional indications for the cara CAD software to the market. As EGS kept on operating independently, the company served Kulzer as well as its own industrial and direct dental clients. With a broad expertise, modern portfolio and a good customer base the company will add extra value for its new owner, Yndetech, owned by Emidio Cennerilli. "This is the ideal solution for EGS and its employees. EGS and Yndetech have complementary solutions and technologies. Emidio Cennerilli, as its former owner, is no stranger to EGS, and understands the potential the technology company has. In this new constellation, EGS, is well poised for growth and success," states Marc Berendes, Kulzer CEO. "With this decision we take the next step in focusing our energy into those fields where we can add differentiated value to our customers' workflows, have good growth opportunities and strong competitive positions. In terms of digital solutions, Kulzer is focusing its development on 3D printing and intra-oral scanner solutions. These are both fast developing areas that we are already heavily invested in," explains Dr. Sascha Cramer von Clausbruch, CTO at Kulzer.

Especially the cara Print 4.0 3D printer offers an open data architecture to be connected to all open CAD software systems in the market. Customers request open production systems. The Kulzer solution allows dental professionals to add the cara Print 4.0 into their established digital workflow.

Customers with a cara Scan can rely on ongoing support as well as regular updates of the accompanying software. Current cara Scan customers will receive personalized communication on their relevant service support.

## **Kulzer GmbH**

Kulzer GmbH is one of the world's leading dental companies with its headquarters in Hanau, Germany. As a trusted partner for more than 80 years, the company supplies dental professionals with an extensive product range, covering cosmetic dentistry, tooth preservation, prosthetics, periodontology and digital dentistry. More than 1,500 employees at 26 locations worldwide are driven by their expertise and passion for the dental market and embody what the name Kulzer stands for: service, quality and innovation.

Kulzer is part of the Japanese Mitsui Chemicals Group. Mitsui Chemicals, Inc. (MCI) is based in Tokyo, and has 137 affiliates with more than 14,300 employees in 27 countries worldwide. Its innovative, practical chemical products are as much in demand in the automotive, electronics and packaging industries as they are in other fields such as environmental protection and healthcare.
