

Create short URLs & QR-codes - mobile website (Sep 2023)

- The short URLs created will be in the language domain selected. For example, if IT is selected, the short URL created will be www.kulzer-dental.it/hash. If FR is selected, the short URL created will be www.kulzer.fr/hash (Countries that do not have their own domain but have a small presence under kulzer.com should contact the Digital Marketing Team for the creation of short URLs.)
- Keep the short URLs short and readable to make it easier for users to type in the URLs.
- It is better (more visible) to use hyphens than underscore between words. For example, better www.kulzer.com/video-cara than www.kulzer.com/video_cara
- Short URLs in our FS are not case-sensitive. For example, if www.kulzer.com/caraScan or www.kulzer.de/VenusDiamond are created, www.kulzer.com/carascan, www.kulzer.de/venusdiamond are also valid and linked to the same URL.

First Important Step: Check if the short URL already exists

1. Create Short URLs & QR-codes

- 1.1 Short URL does not exist - create a new short URL & QR-code
- 1.2 Short URL exists but not for your country - add existing short URL to your country tab
- 1.3 Edit existing short URL & QR-code in your country tab

2. Save & Publish

3. Download QR-codes

(Click on the above points to go directly to the right page)

First Important Step: Check if the short URL already exists

- Under **Data Sources**, select the folder Redirects and click on **Redirects**
- The list of ALL short URLs that have been created for ALL countries will appear
- Insert the short URL that you would like to create in the “*search field*”
- Click **search** to see if it exists

The screenshot displays a web application interface for managing data sources. On the left, a sidebar titled 'Data sources' shows a tree view with folders: Blog, Product catalogue, Redirects, and Technical. The 'Redirects' folder is selected and highlighted in yellow. The main content area shows the 'Current datasets' view for the 'Redirects' folder. A search filter is applied, with the text 'try-rwd' entered in the search field and highlighted in yellow. The search results are displayed in a table with the following columns: ID, Short URL: Please i..., external, internal or ..., Please choose the t..., Target-URL: Please..., and Product. The first row of the table shows a match for ID 30339 with the short URL 'try-rwd' and target URL 'https://kulzer.com/en/'.

ID	Short URL: Please i...	external, internal or ...	Please choose the t...	Target-URL: Please...	Product
30339	try-rwd	external		https://kulzer.com/en/	
30210	youtube-kulzer-iberia				
30209	video-trucos-ibond				
30208	video-one-tecnologia				
30173	video-one				
30172	video-hcsaphir-pers				
30171	video-hcsaphir-estan				
30170	venus-supra-catalog				
30169	venus-one-test				
30168	venus-one-novedad				
30167	venus-one-catalogo				

1. Create Short URLs & QR-codes

1.1 Short URL does not exist - create a new short URL & QR-code

- The short-URL does not exist
- To create the short-URL, switch to **Edit mode**
- Select the correct country tab
- Click on the **+** sign
- Insert the new short URL, without the domain in front
- You may add a short description to indicate where the short URL will be used
- Select if the Target URL is *external*, an *internal page* or a *product page*

External

- If the target URL is an *external* URL, select **external** and insert the external Target URL

" THIS WILL BE AUTOMATICALLY ADDED.)' with the value 'new RWD'; 'DESCRIPTION' (empty); 'EXTERNAL, INTERNAL OR PRODUCT' with radio buttons for 'external' (selected), 'internal', and 'Product'; 'TARGET-URL: PLEASE INPUT THE TARGET-URL HERE' with the value 'https://kulzer.com/en/en/start/homepage.html'; 'CREATION DATE OF THE QR-CODE' with the value '19 May 2022, 17:39'; 'SELECTION THE SIZE OF THE QR-CODE THAT WILL BE GENERATED' with radio buttons for '(1) 150x150', '(2) 250x250', '(3) 500x500', and '(4) 1000x1000' (selected); and 'PRINT QR CODE WITH BRANDING (Default value)' with radio buttons for 'yes' (selected) and 'no'."/>

Internal

- If the target URL is an *internal page*, select **internal** and click on the **Folder**.
- A new window will appear
- Select the required *Internal Folder* and click **Select**

The screenshot displays a web management interface with a top navigation bar containing language options: EN, INT2, DE, DE_AT, ES, FR, IT, PT, ZH, GR, FR_B, NL_B, ES_MX, EN_US, EN_EE, JA, EN_KT, DE_.

The main content area is titled "gluma_desensitizer" and includes the following sections:

- SHORT URL:** PLEASE INPUT THE SHORTURL (SMARTURL) (WITHOUT "WWW.KULZER.COM/" THIS WILL BE AUTOMATICALLY ADDED.)
Input field: gluma_desensitizer
- DESCRIPTION:** Empty text area.
- EXTERNAL, INTERNAL OR PRODUCT:** Radio buttons for external, internal (selected), and Product.
- PLEASE CHOOSE THE TARGET URL:** Reference: About GLUMA. A file selection icon is highlighted.

A "Please choose a file" dialog box is overlaid on the interface. It features a search bar and a "Navigation" pane showing a site structure:

- Start
- For Dentists
- Products by Indicat
- Products by Brand
 - Agfa
 - cara
 - Charisma
 - Flexitime
 - GLUMA (highlighted)

The "About GLUMA" file is selected in the main pane. The right-hand pane shows metadata for the selected file:

- General:** File name: gluma_1 (highlighted); Keywords: (empty)
- Options:** Show in page group:
- Menu overview (Sitemap):** (empty)

At the bottom of the dialog, there are "Select" and "Cancel" buttons.

- To link to a **document in the Downloads**, select **internal** and click on the **Folder**.
- A new window will appear Click on **Media**, go to **Product Downloads** and select the required **document** and click **Select**

Product

- If it is a **product page**, select **Product** and click on the **Folder**.
- A new window will appear
- Select the required **Product Folder** and click **Select**

The image shows a web application interface for configuring a product. The main page is titled "caraprint-cam2.0" and has a breadcrumb trail: "Data sources (root) > Redirects > Redirects > caraprint-cam2.0". The page contains several form fields:

- SHORT URL:** A text input field containing "caraprint-cam2.0".
- DESCRIPTION:** An empty text input field.
- EXTERNAL, INTERNAL OR PRODUCT:** Radio buttons for "external", "internal", and "Product". The "Product" option is selected and highlighted in yellow.
- PRODUCT:** A section containing a "Products, Record: 22211" label and a "cara® Print CAM 2.0 ID: 22211" entry. A yellow box highlights a folder icon next to the record label.

Overlaid on the bottom of the main page is a dialog box titled "Please select a dataset". The dialog has a search bar and a "Navigation" tab. The "Products" folder is selected in the left sidebar. The main area of the dialog shows a table of "Current datasets" with the following data:

ID	Product name	Show product in thi...	brand	product group
22336	dima® Print Mouth Guard	<input checked="" type="checkbox"/>	[dima print]	[3D-printing materials]
22211	cara® Print CAM 2.0	<input checked="" type="checkbox"/>	[cara print]	[3D Printing Software]
22016	Lumident	<input type="checkbox"/>	[(JP) Lumident]	[(JP) Interdental brush]
21824	Hera® TM	<input type="checkbox"/>	[Hera]	[Wires - Precious Metal, Wires - Non Precious Metal]
20544	RetraXil®	<input checked="" type="checkbox"/>	[Further products]	[Soft Tissue Management]
19008	3D printed dentures	<input type="checkbox"/>	[dima]	[3D-printing materials]

At the bottom of the dialog, there are "Select" and "Cancel" buttons. The "Select" button is highlighted in yellow. The status bar at the bottom of the dialog shows "Start Workflow", "ID: 22211", "7/7/22, 10:01 AM", and "f17793 (Svalina, Gabrijela)".

- After selecting the product page, you may link to an Anchor-Link in a product page
- Click on **Jump mark** and select the required module in the dropdown
- In this case, it is *Downloads*
- Double click on *Downloads*
- Now the Short-URL is linked to the correct Anchor-Link:

<https://kulzer.com/en/en/products/cara-print-4-0-pro.html#downloads>

The screenshot shows a configuration interface with several sections:

- EXTERNAL, INTERNAL OR PRODUCT:** Radio buttons for 'external', 'internal', and 'Product' (selected).
- DEFAULT PRODUCT:** A search bar containing 'Products, Record: 22211' and a dropdown menu showing 'cara® Print CAM 2.0' with 'FS-ID: 22211 / Technical- ID: 3519040'. A 'Further usages: 10' indicator and a 'Show usages' button are present.
- LANGUAGE DEPENDENT PRODUCT:** A search bar with '(No selection made)' and a 'Show usages' button.
- Jump mark:** A dropdown menu is open, showing options: 'Downloads' (highlighted), 'Specifications', 'Accessories', 'Placeholder 3', 'FAQ', 'Downloads' (highlighted), 'Placeholder 4', 'Contact', and 'Related products'.
- SELECTION:** Radio buttons for different sizes: '(1) 150x150' (checked), '(2) 250x250', '(3) 500x500', and '(4) 1000x1000'.

- By default, a **QR-code** in the size 150x150 will be created
- 2 versions of the QR-code will be created – with and without the Kulzer icon
- If you need the QR-code to be in a higher resolution, you may select another size.

The screenshot shows a configuration interface for QR code generation:

- SELECTION THE SIZE OF THE QR-CODE THAT WILL BE GENERATED:** Radio buttons for four sizes: '(1) 150x150' (checked), '(2) 250x250', '(3) 500x500' (checked), and '(4) 1000x1000'.
- PRINT QR CODE WITH BRANDING (Default value):** Radio buttons for 'yes' (selected) and 'no'.

1.2 Short URL exists but not for your country - add existing short URL to your country tab

- **Check if the existing short-URL is in your country tab**
- Double-click on the short URL
- Select the tab for your country
- You can see if the short URL has been created for your country
- If all buttons are empty, the short URL has not been created for your country

Example: in this case, the short URL exists but was not created for DE

1.3 Edit existing short URL & QR-code in your country tab

- The short-URL exists in your country tab
- To edit, switch to Edit mode
- You may change the Target URL
- Do not change the short-URL
- Select another size of the QR-code if required
- Save changes made

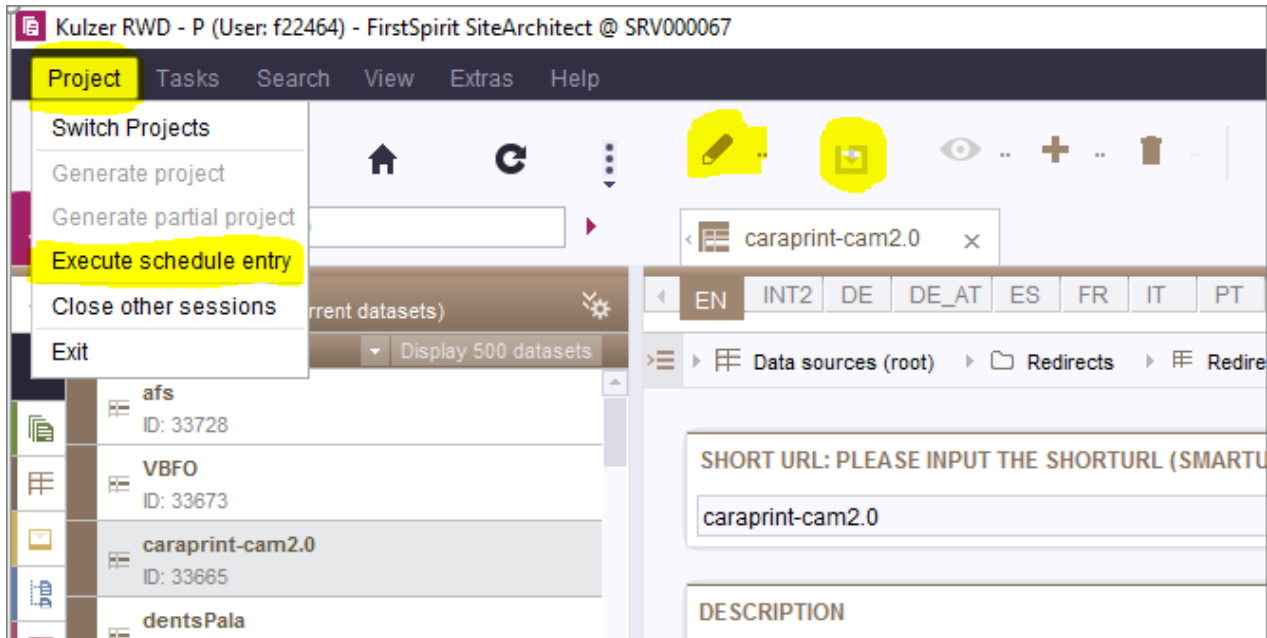

Example: in this case, the short URL exists and has been created for EN:

The screenshot shows a web application interface for editing a short URL and QR code. The interface is in English (EN) and is titled 'try-rwd'. The breadcrumb navigation shows the path: Data sources (root) > Redirects > Redirects > try-rwd. The form contains the following fields and options:

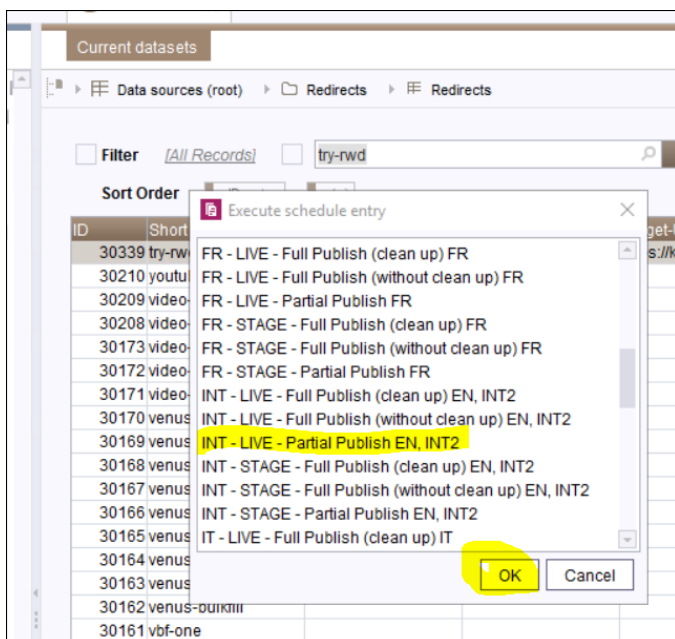

- SHORT URL:** PLEASE INPUT THE SHORTURL (SMARTURL) (WITHOUT "WWW.KULZER.COM" THIS WILL BE AUTOMATICALLY ADDED.)
try-rwd
- DESCRIPTION:** (Empty text input field)
- EXTERNAL, INTERNAL OR PRODUCT:**
 - external
 - internal
 - Product
- TARGET-URL:** PLEASE INPUT THE TARGET-URL HERE
https://kulzer.com/en/downloads/venus_7/venus_8/Venus_Family_Produktinformation_GB.pdf
- CREATION DATE OF THE QR-CODE:**
19 May 2022, 14:14
- SELECTION THE SIZE OF THE QR-CODE THAT WILL BE GENERATED:**
 - (1) 150x150
 - (2) 250x250
 - (3) 500x500
 - (4) 1000x1000
- PRINT QR CODE WITH BRANDING (Default value):**
 - yes
 - no

2 Save & Publish

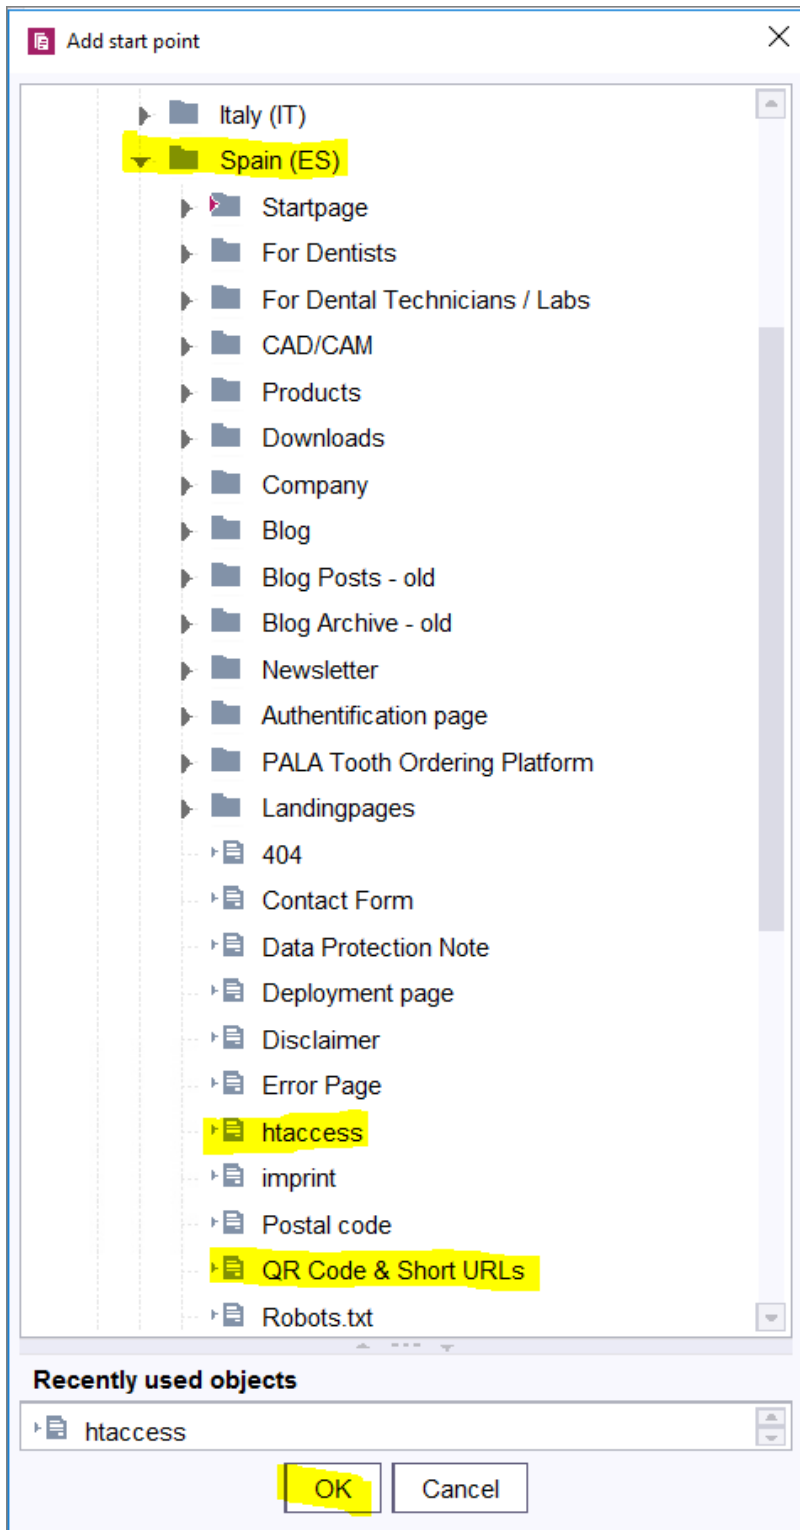

- Click save to save all entries
- 2 pages need to be published: **htaccess** and **QR Code & Short URLs**
- To publish, switch to **View mode** by clicking on **edit**
- Go to Project, select **Execute schedule entry**

- A new window will appear
- Go to your country
- Select **LIVE - Partial Publish**
- Click **OK**

- A new window will appear
- Select your country folder
- Select both pages **htaccess** and **QR Code & Short URLs**
- Click **OK**
- A notification will appear when the entries are published

3 Download QR-codes

- To download the QR-code, go to this best-practice webpage:

https://www.kulzer.com/en/modules/best-practice.html#short_urls_qr_codes

- Select your country
