	SECTION 4: First aid measures
•	4.1 Description of first aid measures
	• After inhalation Supply fresh air; consult doctor in case of symptoms.
	After skin contact
	Instantly wash with water and soap and rinse thoroughly.
	If skin irritation continues, consult a doctor.
	After ave contect

- After eye contact Rinse opened eye for several minutes under running water. Then consult doctor.
- After swallowing

Rinse out mouth and then drink plenty of water.

- In case of persistent symptoms consult doctor.
- · 4.2 Most important symptoms and effects, both acute and delayed Allergic reactions
- 4.3 Indication of any immediate medical attention and special freatment needed No further relevant information available.

### **SECTION 5: Firefighting measures**

- 5.1 Extinguishing media
  - Suitable extinguishing agents CO2, sand, extinguishing powder. Do not use water. For safety reasons unsuitable extinguishing agents Water.
- <sup>•</sup> 5.2 Special hazards arising from the substance or mixture
- Can form explosive gas-air mixtures.

Formation of toxic gases is possible during heating or in case of fire.

(Contd. on page 3)

Page 3/11

Safety data sheet according to 1907/2006/EC, Article 31

Printing date 03.08.2022

Version number 4 (replaces version 3)

Revision: 03.08.2022

### Trade name: Meliodent Rapid Repair Liquid

- 5.3 Advice for firefighters
  - Protective equipment: No special measures required.
  - · Additional information -

### SECTION 6: Accidental release measures

**6.1 Personal precautions, protective equipment and emergency procedures** Wear protective equipment. Keep unprotected persons away. Avoid contact with eyes and skin.

 6.2 Environmental precautions: Prevent material from reaching sewage system, holes and cellars.
 6.3 Methods and material for containment and cleaning up: Absorb with liquid-binding material (diatomite, universal binders, for small amounts tissues). Do not flush with water or aqueous cleansing agents

- · 6.4 Reference to other sections
- No dangerous materials are released.
- See Section 7 for information on safe handling
- See Section 8 for information on personal protection equipment.
- See Section 13 for information on disposal.

### SECTION 7: Handling and storage

- · 7.1 Precautions for safe handling
- Keep containers tightly sealed.
- Ensure good ventilation/exhaustion at the workplace.
- Prevent formation of aerosols.

Ensure good interior ventilation, especially at floor level. (Fumes are heavier than air).

- Information about protection against explosions and fires:
- Keep ignition sources away Do not smoke.
- Protect against electrostatic charges.
- 7.2 Conditions for safe storage, including any incompatibilities
   Storage
  - Requirements to be met by storerooms and containers: Store in cool location.
  - · Information about storage in one common storage facility: Not required.
  - Further information about storage conditions:
  - Store cool (not above 25 °C).
  - Store in cool, dry conditions in well sealed containers.
- 7.3 Specific end use(s) No further relevant information available.

### SECTION 8: Exposure controls/personal protection

#### · 8.1 Control parameters

• Components with critical values that require monitoring at the workplace:		
80-62-6 methyl methacrylate		
WEL (Great Britain)	Short-term value: 416 mg/m³, 100 ppm Long-term value: 208 mg/m³, 50 ppm	
IOELV (European Union)	Short-term value: 100 ppm Long-term value: 50 ppm

*Printing date 03.08.2022* 

Version number 4 (replaces version 3)

Revision: 03.08.2022

### Trade name: Meliodent Rapid Repair Liquid

(Contd. of page 4) soil, dry weight 100 mg/Kg (not defined) · Additional information: The lists that were valid during the compilation were used as basis. 8.2 Exposure controls Appropriate engineering controls No further data; see item 7. Individual protection measures, such as personal protective equipment General protective and hygienic measures Keep away from foodstuffs, beverages and food. Instantly remove any soiled and impregnated garments. Wash hands during breaks and at the end of the work. Avoid contact with the eyes and skin. · Breathing equipment: Not neccessary with efficient local exhaust. If exposition to vapours is possible, use breathing protective mask (filter A). Hand protection The glove material has to be impermeable and resistant to the product/ the substance/ the preparation. Selection of the glove material on consideration of the penetration times, rates of diffusion and the degradation If skin contact cannot be avoided, protective gloves are recommended to avoid possible sensitization. Solvent resistant gloves Check protective gloves prior to each use for their proper condition. recommended Material of gloves The selection of the suitable gloves does not only depend on the material, but also on further marks of quality and varies from manufacturer to manufacturer. As the product is a preparation of several substances, the resistance of the glove material can not be calculated in advance and has therefore to be checked prior to the application. Penetration time of glove material The exact break trough time has to be found out by the manufacturer of the protective gloves and has to be observed. · For the permanent contact of a maximum of 15 minutes gloves made of the following materials are suitable: Butyl rubber, BR Nitrile rubber, NBR · Eye/face protection Tightly sealed safety glasses. · Body protection: Light weight protective clothing SECTION 9: Physical and chemical properties 9.1 Information on basic physical and chemical properties **General Information** Physical state Fluid Colourless Colour: Smell: Characteristic Odour threshold: Not determined. · Melting point/freezing point: Not determined · Boiling point or initial boiling point and 100 °C (80-62-6 methyl methacrylate) boiling range · Flammability Not applicable. · Lower and upper explosion limit · Lower: 2.1 Vol % (Contd. on page 6)

## Safety data sheet according to 1907/2006/EC, Article 31

Printing date 03.08.2022

Version number 4 (replaces version 3)

Revision: 03.08.2022

### Trade name: Meliodent Rapid Repair Liquid

(Contd. of page 6)

#### SECTION 10: Stability and reactivity

· 10.1 Reactivity No further relevant information available.

#### 10.2 Chemical stability

• Conditions to be avoided: No decomposition if used and stored according to specifications.

· 10.3 Possibility of hazardous reactions No dangerous reactions known

**10.4 Conditions to avoid** No further relevant information available.

• **10.5 Incompatible materials:** No further relevant information available.

• **10.6 Hazardous decomposition products:** None • **Additional information:** If stored longer than recommended and/or above recommended temperature,

product may polymerize generating heat.

#### SECTION 11: Toxicological information

• 11.1 Information on hazard classes as defined in Regulation (EC) No 1272/2008 • Acute toxicity Based on available data, the classification criteria are not met.

## Safety data sheet according to 1907/2006/EC, Article 31

Printing date 03.08.2022

Version number 4 (replaces version 3)

Revision: 03.08.2022

(Contd. of page 8)

### Trade name: Meliodent Rapid Repair Liquid

· 12.6 Endocrine disrupting properties

For information on endocrine disrupting properties see section 11.

12.7 Other adverse effects

Additional ecological information:

General notes:

Do not allow product to reach ground water, water bodies or sewage system. Danger to drinking water if even small quantities leak into soil.

· 13.1 Waste treatment methods

Recommendation

Must not be disposed of together with household garbage. Do not allow product to reach sewage system.

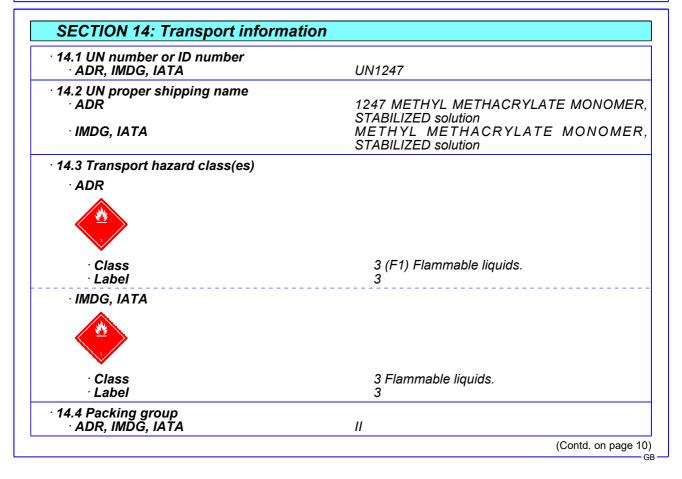

Disposal must be made according to official regulations.

Uncleaned packagings:

Recommendation:

Disposal must be made according to official regulations.

Non contaminated packagings can be used for recycling.

### SECTION 15: Regulatory information

· 15.1 Safety, health and environmental regulations/legislation specific for the substance or mixture

· Directive 2012/18/EU

- · Named dangerous substances ANNEX I None of the ingredients is listed.
- · Seveso category P5c FLAMMABLE LIQUIDS
- Qualifying quantity (tonnes) for the application of lower-tier requirements 5.000 t Qualifying quantity (tonnes) for the application of upper-tier requirements 50.000 t
- 15.2 Chemical safety assessment: A Chemical Safety Assessment has not been carried out.

#### **SECTION 16: Other information**

These data are based on our present knowledge. However, they shall not constitute a guarantee for any specific product features and shall not establish a legally valid contractual relationship.

Relevant phrases

H225 Highly flammable liquid and vapour.

H301 Toxic if swallowed.

H311 Toxic in contact with skin.

H315 Causes skin irritation.
